# **DETAILED ACTION**

#### CLAIMS

# Summary

Claims 1,6,7 and 8 are the independent claims under consideration in this Office action.

Claims 2-5 and 9-11 are the dependent claims under consideration in this Office action.

# Claim Rejections - 35 U.S.C. § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) The invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 8 are rejected under 35 U.S.C. § 102(b) as being anticipated by Platt (2,9000,941).

Platt teaches a sewing machine comprising a sewing machine body (figure 1) provided with a cassette mount 30,31,32 and teaches a thread cassette, that is, the use of a thread spool for supplying a thread to a needle of the sewing machine. A moving speed limiting unit 32 is provided on the mount for limiting a moving speed of the thread cassette when the thread is attached to the cassette mount.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the Application/Control Number: 10/656,338

Art Unit: 3765

requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1 and 5-8 are rejected under 35 U.S.C. § 102(e) as being anticipated by Kitazawa (JP2002191884).

Kitazawa teaches a sewing machine comprising a sewing machine body 4,5,6 (figure 1) provided with a cassette mount 3 (see figure 16, for example) and a thread cassette 2 having a supply of thread 62 and detachably attached to the cassette body via pin 64. A moving speed limiting unit 126,120, 120a is provided for resisting the movement or loading of the cassette within the mount and thus limiting the moving speed of the thread cassette when the cassette is attached to the cassette mount. In another embodiment (see figure 38), the cassette includes a protrusion or cam surface 137 and the sewing machine includes a moving speed limiting unit 138 which includes a roller 142 biased toward the cam surface, and thus is provided on the mount for limiting a moving speed of the thread cassette when the thread is attached to the cassette mount. Kitazawa includes a first operating force transmitting member 120a and a second force transmitting member 119 for assisting in actuating a needle threader 37a

Art Unit: 3765

which is moved from a thread contacting position to a needle threading position is response to the loading of the thread cassette in the mount (figure 17, for example)

# **ALLOWABLE SUBJECT MATTER**

Claims 2-4 and 9-11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

# PERTINENT CITATIONS

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Jimenez et al. '234 and '866, and Hashiride illustrate thread cassettes or spools loaded onto mounts. Odermann et al., Wada et al., Hori, Bass et al., and Mamiya illustrate thread cassettes mountable to sewing machines.

# **INQUIRIES**

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ismael Izaguirre whose telephone number is (571) 272-4987. The examiner can normally be reached on M-F (8:30-6:00).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John Calvert can be reached on (571) 272-4983. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
